At the Intersection of IT Security & Society

This was an excellent webinar with good information for small businesses and tech support companies like us who provide advice on support and security to our customers. The information covered can be passed along to our customers so they are #CyberAware!

Over 10,000 webinar attendees
Over 5,000 workshop attendees
Over 15,000 subscribers
Today’s Guest Speaker

Perry Carpenter
Chief Evangelist & Strategy Officer

KnowBe4
Human error. Conquered.
Start at the Beginning
-- Make use of Frameworks --
NIST Cyber Security Framework

- Identify
- Protect
- Detect
- Respond
- Recover
Identify Your Drivers

Efficiency
- Save time
- Save money

Effectiveness
- Compliance
- Meeting security goals

Business Enablement
- Furthering business goals
- Differentiation
Four Strategic Layers of the Modern Security Stack

- Devices
- Network
- Infrastructure
- People

Brainstorming Your Protection Needs

Follow the User(s)

Follow the Data
Brainstorming Your Protection Needs

And what about direct Connections between these?
Consider Your Current Stage of Growth, Maturity, and Need
Don’t wait until it is too late to do BC/DR planning
Circling back on two important concepts

Consider your current needs, stage of growth, and aspirations. Then see how your chosen security framework helps to inform you’re the security stack.
Consider the tradeoffs between what you want to **own** and what you want to **outsource**.
Essentials
Education & Preparation

Your people are your first and last line of defense
